Keraliya Hiren

Data Scientist | Machine Learning Engineer | Data Analyst

+91 63531 93330 | hirenkeraliya99@gmail.com | github.com/hiren223
linkedin.com/in/hirenkeraliya | hiren223.github.io | Ahmedabad, India

Professional Summary

Entry-level Data Scientist with hands-on project experience building end-to-end machine learning pipelines in Python and SQL. Developed a predictive model achieving 79% accuracy and earned NASSCOM (95% score) and IABAC certifications. Skilled in data cleaning, feature engineering, model tuning, and Power BI dashboards that turn complex data into actionable business insights.

Experience

Data Scientist Intern *Aug 2025 – Feb 2026*
Rubixe – AI Solutions Company, Bengaluru *6 months*

- Developed and evaluated machine learning models supporting AI-driven product features across **1 client projects**, contributing to **15% accuracy improvement** in predictive analytics.
- Processed and analyzed **50,000+ records** from multiple industrial domains using Python and Scikit-learn; **reduced data preprocessing time by 40%** through automated feature selection.
- Performed advanced data preprocessing, EDA, and feature engineering; identified **8+ critical data quality issues** and documented findings for client stakeholders.
- Collaborated with cross-functional teams across engineering, product, and business to design end-to-end ML solutions aligned with measurable KPIs; participated in **15+ client meetings**.
- Documented model performance metrics including Precision, Recall, F1-Score, and ROC-AUC; created **10+ executive-ready presentations** for business stakeholders.

Projects

Customer Churn Prediction – Business Case *2025*
Machine Learning Project | Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Built an end-to-end churn prediction pipeline achieving **0.79 accuracy** on held-out test data.
- Performed comprehensive EDA on **50,000+ customer records**, identifying **8 key churn indicators** including contract type, tenure, and monthly charges.
- Uncovered **5 behavioral patterns** affecting 23% of the customer base; detected and handled 3.5% missing values and 2 outlier clusters.
- Evaluated **6 classification algorithms**: Logistic Regression, Random Forest, Decision Trees, XGBoost, SVM, and KNN; selected the best performer using F1-Score optimization.
- Created interactive visualizations using Matplotlib and Seaborn and delivered insights to non-technical stakeholders.
- View Project on GitHub

Smart Agriculture Analytics Dashboard *2026*
Data Analytics Project | Power BI, Power Query, DAX, Data Cleaning, Data Visualization

- Developed an interactive **4-page Power BI dashboard** analyzing historical crop yield, soil conditions, and weather patterns across crops, states, districts, and years (2020–2024).
- Cleaned and transformed agricultural data using **Power Query** and built measures in **DAX** for average yield, rainfall, temperature, humidity, soil pH, and soil N, P, K levels.
- Designed pages for Agriculture Overview, Crop Performance, Soil & Weather Analysis, and Crop Advisory, with crop, state, district, and year slicers for dynamic filtering.
- Analyzed yield trends and identified a **decline in 2023 (10,289 kg/ha) followed by recovery in 2024 (11,197 kg/ha)**; flagged sugarcane as a high-yield outlier (∼78K kg/ha) versus most crops at 2K–4K kg/ha.
- Explored rainfall, temperature, and soil pH against yield using scatter plots, and ranked the **top 10 districts by average yield** to support regional benchmarking.
- View Project on GitHub

Technical Skills

Programming: Python, SQL

Data Preparation: Data Cleaning, Data Preprocessing, Missing Value Imputation, Outlier Detection & Treatment, Feature Engineering, Feature Selection, Encoding & Scaling, Data Transformation

Machine Learning: Scikit-learn, Classification, Regression, Random Forest, Decision Trees, XGBoost, Hyperparameter Tuning, Cross-Validation, Model Evaluation, Model Optimization

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Analysis, Data Quality Assessment, Correlation Analysis

Visualization: Matplotlib, Seaborn, Power BI, Data Dashboarding, Data Storytelling

Tools: Jupyter Notebook, Google Colab, VS Code, Power BI, Git/GitHub, MySQL

Soft Skills

- Communication
- Team-work
- Problem-Solving
- Adaptability
- Self-Motivated

Education

Bachelor of Computer Application (BCA) *2022 – 2025*
Silver Oak University, Ahmedabad *CGPA: 7.31 / 10*

Certifications & Achievements

Certified Data Scientist – NASSCOM / FutureSkills Prime *Jun 2026*
Score: **95/100** – Top 5% Performer

Data Science Foundation – IABAC *Jun 2026*
International Association of Business Analytics

Data Analytics Simulation – Deloitte Australia *Jul 2026*
Forage Platform – Created data dashboard using Tableau
